Document history

Document ID	Smart Risk V2.2	Approved By	Amrish Kumar
Prepared By	Nikhil Kumar Sharma	Document Custodian	PAS
Reviewed By	Madhulika Thakur	Document Release Date	01 April 2024
Classification	Internal	Version	2.3

Introduction

This document explains the Smart Risk APIs which expose supplier data from the Smart Risk application. This document can be used by the technical team who would be consuming the APIs to understand the type of information an API shares, along with the details of the request that can be made by the consuming application.

Environments

Smart Risk APIs are available on UAT and production environments; details are given below:

Environment	Description	URL
QA	Used to interact with the QA environment's data set	https://XXXXXXXX/api/v1.0
UAT	Used to interact with the UAT environment's data set	https://smartriskapi.tsclabs.in/api/v1.0
PROD	Used to interact with the Production environment's data set	https://smartriskapi.thesmartcube.com/api/v1.0

Authentication and security

Smart Risk APIs are secured with credentials, and the Smart Cube team will share the API credentials to access the API data. Examples of authentication, request variables and response of all the API endpoints are given below under the Smart Risk API details section.

Methods call limitations

To avoid excessive usage of the methods that can lead to a negative impact on overall performance, specific call number restrictions have been set. The maximum number of requests possible to send in a single call is currently limited to 100 (by the time the API has been first implemented). If a call surpassing this number is sent, an error-response code 400 is returned with the following response:

"API calls quota exceeded!"

Smart Risk API details

Please find below details of APIs:

- ▶ Supplier financials to get suppliers' key financial information and ratios
- ▶ Supplier risk summary to get risk summary from suppliers' risk profiles
- ▶ Supplier risk ratings to get one or more suppliers' risk ratings at both the overall and sub-risk levels
- ▶ Country risk ratings to get country-level risk ratings across P-E-S-T-L-E parameters
- ▶ Supplier parameter to get risk parameter values for one or more suppliers
- ▶ Supplier news to get one or more suppliers' news as available on the platform
- ▶ Key ESG information to get essential environmental, social and governance information if captured on the platform
- ▶ Credit rating information to get suppliers' third-party risk ratings if captured on the platform
- ▶ Country news to get country-level news as available on the platform
- ▶ Category news to get product group or commodity-level news as available on the platform
- ▶ Logistics news to get news on mapped logistics nodes as available on the platform
- ▶ Geographic risk exposures to get list of top 10 sourcing countries for one or more categories
- ▶ Category risk ratings information to extract one or more categories' risk ratings
- ▶ Top trending themes and topics to extract top 10 risk themes for one or more categories
- ▶ Supplier rating updates to get details on suppliers for which ratings have changed on the platform
- ▶ Category rating updates to get details on categories for which ratings have changed on the platform
- ▶ Country rating updates to get details on country for which ratings have changed on the platform

Supplier financials

To get suppliers' key financial information and ratios

Below are details of calling method, request parameters and response of the API:

Method	Endpoint
POST	api/v1.0/financials

Params (Body)	Values	Required	Comments
supplier_code	String	Yes	Maximum 500 supplier code with comma separator can be pass to API Example: SR001, SR002, SR003
Offset	Integer	Optional	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body Request format:

```
{
"supplier_code": "SR001",
"offset": 0
}
```

Headers	Values	Required
username	String	Yes
password	String	Yes

Headers request format:

```
{
"username": "xyz@thesmartcube.com",
"password": "xyz",
"Content-Type": "application/json"
}
```

Response

Status	Response
200	<pre>{ "success": true, "error": false, "message": "OK", "status_code": 200, "payload": { "total_records": 19, "limit": 2000, "offset": 0, "supplier_code_invalid": "", "supplier_data_notprocessed": "", "records": [{ "supplier_name": "SR00001", "supplier_code": "SR001", "client_category": "Accounting", "sourcing_country": "United States", "line_item": "Net profit", "value": 7.2, "unit": "million", "currency": "GBP", </pre>

Supplier risk summary

To get risk summary from suppliers' risk profile

Below are details of calling method, request parameters and response of the API:

Request

Method	Endpoint
POST	/api/v1.0/riskSummary

Params (Body)	Values	Required	Comments
supplier_code	String	Yes	Maximum 500 supplier code with comma separator can be pass to API Example: SR001, SR002, SR003
Offset	Integer	Optional	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body Request format:

```
{
"supplier_code": "SR001",
"offset": 0
}
```

Headers	Values	Required
Username	String	Yes
Password	String	Yes

Headers request format:

```
{
"username": "xyz@thesmartcube.com",
"password": "xyz",
"Content-Type": "application/json"
}
```

Response

Status	Response
200	<pre> { "success": true, "error": false, "message": "OK", "status_code": 200, "payload": { "total_records": 13, "limit": 2000, "offset": 0, "supplier_code_invalid": "", "supplier_data_notprocessed": "", "records": [{ "supplier_name": "SR00001", "supplier_code": "SR001", "client_category": "BUSINESS SERVICES - TRAVEL, MEETING & EVENTS", "sourcing_country": "United States", "supplier_hq": "United States", "supplier_address": "P. O. BOX 123456, DALLAS TX, United States", "supplier_web": "https://www. SR001.com/", "supplier_hq_city": "New York", "supplier_hq_address": "123 AB Street New York, NY 123456, US", "supplier_group": "Group 1", "supplier_status": "Tier 1", "supplier_desc": " SR00001 Travel Related Services provide services such as hotels and travel (cars, flights, cruises) bookings for personal as well as business travel, foreign exchange services and travel insurances globally; it is one of the business of American Express which was founded in 1850 and operates into financial services", "overall_summary": " SR00001 faces low risk due to strong financials and experienced management. However, the country risk exists, the country's GDP grew 5% in 2021 and is expected to grow by 3.2% in 2022. The economy will see a sharp slowdown as the government's fiscal support fades and the impact of Omicron will weigh on services spending and hit the supply chain. Russia and Ukraine combined account for less than 1% of the US imports and exports; the current conflict is not expected to have a major impact on the economy; however, the conflict could help keep inflation pressures elevated.", "last_updated": "26-Mar-2023" }, { "supplier_name": " SR00002", "supplier_code": " SR002", "client_category": "BUSINESS SERVICES - CORPORATE SERVICES", "sourcing_country": "United Kingdom", "supplier_hq": "United Kingdom", "supplier_address": " 123 Midsummer Square, United Kingdom", "supplier_web": "https://www2.SR002.com/", "supplier_hq_city": "London", "supplier_hq_address": "123 New Square, London 123456, United Kingdom", </pre>

	<pre> "supplier_group": "Group 2", "supplier_status": "Tier 1", "supplier_desc": " SR00002 is a consulting service provider with a 100 years of experience; it offers auditing, accounting, financial advisory, risk management and tax services. The firm provides international financial reporting, assurance and advisory, tax auditing, corporate governance, risk consulting, and management and board advisory services. Additionally, it provides merger and acquisition, government compliance, financial advisory and human capital consulting services. Deloitte caters to aviation, defense, automotive, finance, banking, consumer products, healthcare, insurance, life sciences, media, oil and gas, power, real estate, retail, technology, telecommunication, hospitality, and government sectors", "overall_summary": " SR00002 faces low risk due to strong financials, experienced management and low business concentration risk. However, the country risk exists, the country's GDP grew 7.5% in 2021 and is expected to grow by 4.6% in 2022. New Covid-19 variants faster-than-expected monetary tightening and tense relations with the EU, over the Northern Ireland protocol further cloud the outlook.", "last_updated": "05-Mar-2023" }] } } </pre>
401	<pre> { "success": false, "error": true, "message": "Either client does not exist or credential is invalid", "status_code": 401, "payload": [] } </pre>

Supplier risk ratings

To get one or more suppliers' risk ratings at the overall and sub-risk level

Below are details of calling method, request parameters and response of the API:

Request

Method	Endpoint
POST	/api/v1.0/riskRatings

Params (Body)	Values	Required	Comments
supplier_code	String	Yes	Maximum 500 supplier code with comma separator can be pass to API Example: SR001, SR002, SR003
Duration	String	Optional	Duration is fixed as 7d,30d,60d and 90d Example: for 7d, API returns data from current date – 7 days including the current day; default duration is (current date – 1 day)
Offset	Integer	No	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body request format:

```
{
  "supplier_code":"SR001",
  "duration": "7d",
  "offset": 0
}
```

Headers	Values	Required
username	String	Yes
password	String	Yes

Headers request format:

```
{
  "username": "xyz@thesmartcube.com",
  "password": "xyz",
  "Content-Type": "application/json"
}
```

Response

Status	Response
200	{ "success": true, "error": false, "message": "OK", "status_code": 200, "payload": { "total_records": 1, }

Country risk ratings

To get country-level risk ratings across P-E-S-T-L-E parameters

Below are details of calling method, request parameters and response of the API:

Request

Method	Endpoint
POST	/api/v1.0/countryRiskRatings

Params (Body)	Values	Required	Comments
country_name	String	Yes	Maximum 500 country name with comma separator can be pass to API Example: India, Japan, China
duration	String	Optional	Duration is fixed as 7d,30d,60d and 90d Example: for 7d, API returns data from current date – 7 days including the current day; default duration is (current date – 1 day)
Offset	Integer	No	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body request format:

```
{
  "country_name": "India, United States",
  "duration": "90d",
  "offset": 0
}
```

Headers	Values	Required
username	String	Yes
password	String	Yes

Headers request format:

```
{
  "username": "xyz@thesmartcube.com",
  "password": "xyz",
  "Content-Type": "application/json"
}
```

Response

Status	Response
200	<pre>{ "success": true, "error": false, "message": "OK", "status_code": 200, "payload": { "total_records": 1, "limit": 1000, "offset": 0, "country_name_invalid": "", "country_data_notprocessed": "", "records": [{ "country": "United States", "country_overall_risk": 2, "political": 2.5, "economic": 2.5, "social": 1, "technology": 1, "legal": 2.3, "environmental": 2, "country_overall_risk_summary": "Operational risk in the US is low as government looks to reduce debt by strong post-COVID 19 recovery of economy; however, debt levels are higher by 10pp of GDP as compared to pre-COVID 19 levels. Russian invasion of Ukraine in 2022 increased political and social tensions, sanctions imposed on Russia have led to major delay in supply chains, which poses challenges to manufacturing over 2023–2024. Terrorism is an ongoing concern, and firms could be affected directly by attacks. Increase in public spending in response to the pandemic has created long-term fiscal sustainability issues. The deepening US–China rivalry will continue to pose risks, particularly for the control of global semiconductor market as the US plans to start manufacturing semi-conductors on its own.", "date": "2024-03-28" }] } }</pre>
401	<pre>{ "success": false, "error": true, "message": "Either client does not exist or credential is invalid", "status_code": 401, "payload": [] }</pre>

Parameter info of sub-risk

To get risk parameter values for one or more suppliers

Below are details of calling method, request parameters and response of the API:

Request

Method	Endpoint
POST	/api/v1.0/subRiskParameters

Params (Body)	Values	Required	Comments
supplier_code	String	Yes	Maximum 500 supplier code with comma separator can be pass to API Example: SR001, SR002, SR003, SR004
Offset	Integer	No	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body request format:

```
{
  "supplier_code": "SR001, SR002, SR003, SR004",
  "offset": 0
}
```

Headers	Values	Required
Username	String	Yes
Password	String	Yes

Headers request format:

```
{
  "username": "xyz@thesmartcube.com",
  "password": "xyz",
  "Content-Type": "application/json"
}
```

Response

Status	Response
200	<pre>{ "success": true, "error": false, "message": "OK", "status_code": 200, "payload": { "total_records": 1, "limit": 1000, "offset": 0, "supplier_code_invalid": "", "supplier_data_notprocessed": "", "records": [{ "supplier_name": "SR00001", "supplier_code": "SR001", "client_category": "BUSINESS SERVICES - IT INFRASTRUCTURE", "sourcing_country": "United States", "parameters": [{ "risk_type": "Financial", "sub_risk": "Profitability", "parameter": "Revenue growth", "parameter_value": "11.83", "parameter_score": "1.00" }, { "risk_type": "Financial", "sub_risk": "Profitability", "parameter": "Operating margin", "parameter_value": "6.41", "parameter_score": "4.00" }, { "risk_type": "Financial", "sub_risk": "Profitability", "parameter": "Return on assets", "parameter_value": "5.76", "parameter_score": "3.00" }, { "risk_type": "Financial", "sub_risk": "Solvency", "parameter": "Debt-to-capital", "parameter_value": "0.44", "parameter_score": "3.00" }] }] } }</pre>

Supplier news

To get one or more suppliers' news as available on the platform

Below are details of calling method, request parameters and response of the API:

Request

Method	Endpoint
POST	api/v1.0/supplierNews

Params (Body)	Values	Required	Comments
supplier_code	String	Yes	Maximum 500 supplier code with comma separator can be pass to API. Example: SR001, SR002, SR003
Duration	String	Optional	Duration is fixed as 1d, 7d, 30d, 60d, 90d or blank Example: for 7d, API returns data from current date – 7 days
Offset	Integer	No	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body request format:

```
{
  "supplier_code": "SR001, SR002, SR003, SR004",
  "duration": "90d",
  "offset": 0
}
```

Headers	Values	Required
Username	String	Yes
Password	String	Yes

Headers request format:

```
{
"username": "xyz@thesmartcube.com",
"password": "xyz",
"Content-Type": "application/json"
}
```

Response

mode	String	Yes	Example: Road, Rail, Air, Ocean, Warehousing
Duration	String	Optional	Duration is fixed as 1d, 7d, 30d, 60d, 90d or blank Example: for 7d, API returns data from current date – 7 days
Offset	Integer	No	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body request format:

```
{
  "mode": "Road, Rail, Air",
  "duration": "90d",
  "offset": 0
}
```

Headers	Values	Required
username	String	Yes
password	String	Yes

Headers request format:

```
{
  "username": "xyz@thesmartcube.com",
  "password": "xyz",
  "Content-Type": "application/json"
}
```

Response

Status	Response

Geographic risk exposures

To get list of top 10 sourcing countries for one or more categories

Below are details of calling method, request parameters and response of the API:

Request

Method	Endpoint
POST	api/v1.0/geographicRiskExposures

Params (Body)	Values	Required	Comments
category	String	Yes	Maximum 500 category with comma separator can be pass to API. Example: CR001, CR002, CR003
Offset	Integer	Optional	Offset: 0: The records on the first page, i.e., 1 to 500 records Offset: 1: The records on the second page, i.e., 501 to 1000 records

Body request format:

```

{
  "category": "CR001",
  "offset": 0
}

```

Headers	Values	Required
username	String	Yes

password	String	Yes
----------	--------	-----

Headers request format:

```
{
"username": "xyz@thesmartcube.com",
"password": "xyz",
"Content-Type": "application/json"
}
```

Response

}

```

Response

Status	Response
200	<pre>{ "success": true, "error": false, "message": "OK", "status_code": 200, "payload": { "total_records": 28, "limit": 2000, "offset": 0, "records": [{ "country_id": CU001, "country_name": "Brazil" }, { "country_id": CU002, "country_name": "United States" }, { "country_id": CU003, "country_name": "India" }] } }</pre>
401	<pre>{ "success": false, "error": true, "message": "Either client does not exist, or credential is invalid", "status_code": 401, "payload": [] }</pre>

Response code and message

Response Code	Use Case	Response Message
200: OK	The request was successful	Requested data has been successfully returned
400: Bad Request	The request cannot be processed due to a bad syntax	Invalid Json format supplied
	Missing Mandatory Data	i.e., the supplier code field is required
	Wrong attribute format (not the specified type)	i.e., the offset must be a number
	Maximum number of requests in a single method call exceeded	N/A
	Maximum number of permissible input exceeded	i.e., the supplier limit 500 exhausted
401: Unauthorized	Correct Authentication has not been provided	Either client does not exist or credential is invalid
404: Not Found	The server has not found any data matching with the request or wrong URL entered	The server has not found any data matching with the request
405: Method Not allowed	Using the wrong method	Using POST instead of GET. Not possible as this method is read-only
429: Too many requests	Method call limitation exceeded	
500: Internal Server Error	The server encountered an unexpected condition which prevented it from fulfilling the request	Request not fulfilled because of an internal error
502: Bad Gateway	The server, while acting as a gateway or proxy, received an invalid response from the upstream server it accessed in attempting to fulfil the request	Error in the database, not in the REST API
503: Service Unavailable	The server is currently unable to handle the request due to a temporary overloading or maintenance of the server. The implication is that this is a temporary condition which will be alleviated after some delay	
505: HTTP Version not supported	The server does not support or refuses to support the HTTP protocol version that was used in the request message	The HTTP version used by the Client is not supported by the REST API

For leading businesses around the world, **The Smart Cube, a WNS company**, is a trusted partner for high performing intelligence that answers critical business questions. We work with our clients to figure out how to implement these answers, faster, through custom research, advanced analytics and best of breed technology. We transform data into insights – enabling smart decision-making to improve business performance at the top and bottom line.

We call it: **Intelligence. Accelerated.**

Together with WNS, we combine expert resources with leading digital technologies, merging human and artificial intelligence with innovation. We enable our clients to deliver on their business, financial and sustainability goals and outperform in their markets. Together we have strengthened our leadership position in analytics, advisory, managed services and digital transformation.

The Smart Cube's clients include a third of the companies in the FTSE and Fortune 100, primarily in the CPG, Life Sciences, Energy, Chemicals, Industrials, Financial Services, Professional Services and Retail sectors. We serve our global client base from our offices in the UK, the USA, Switzerland, Romania, and India.

For more information, visit: www.thesmartcube.com
